Brief write up on activities

Shirdi Sai Baba Temple Society is a registered non-profit free educational institute to deliver impactful social impact. It works towards implementing holistic social development projects across multiple causes including Education, Women's empowerment, Skill, Health and Livelihood.

1. Free & Quality Education

Touched by the plight of poor children from neighboring clusters, loitering aimlessly around our campus, it occurred to us that these children needed an opportunity to be educated along with some incentive to motivate them to do so. We, therefore, in April 2004, established '**Shirdi Sai Baba School**' for providing 100% free and quality education to poor children with food, uniforms, books, study material, sports, health care and excursion. The motivation to poor people bore fruit and the number of children has since risen to more than 1500 at Faridabad 600 at Niswara Dist Mahoba – Backward Bundelkhand UP out of which over 50% are girls. The schools are as good as any public school in India and the school at Faridabad is now affiliated to **CBSE upto Senior Secondary level** with English medium.

**Preschool-KG classes**

Brain development happens from 3-6 years of age and unattended rural kids in this age-group effects overall development of children. Keeping this in view we have setup Preschool-KG classes on the basis of performing arts under guidance of Buildingkidz Inc USA for last four years and the children coming out of this class have a better IQ and desire to learn.

Initial hurdles:

Initially when the school was started the absenteeism in the school was very high and even the parents were reluctant to send their wards to the school, instead expecting them to work and add to the family income.

High Quality Computer Education:

To make education of these children compatible with the modern technology, we set up new technology based computer five labs consisting of 151 computers, internet, printer and LCD with coaching under the direction of NIIT for the overall development of these children.

Smart Classes

For bringing a successful transformation to Digital Technology, Thirty four Smart Classes, with 'Interactive Boards and Projectors' have been introduced where teachers now use videos, animations, live images and captivating graphics right inside their classrooms making learning more interesting and effective for the students.

Excursions

Students are sent on excursions from time to time to Ranthambhore, Agra, Fatehpur Sikri, Bharatpur, Mughal Gardens, and other places in and around Delhi at institution's expenses to provide them recreation and enrich their knowledge.

Changes brought in

Nutritious food and regular health care have not only brought healthy glow and cheers on the faces of these children but have also brought in a great improvement in the interest that these children are now showing in their studies and in the regularity of attending the school.

Other Facilities

A well-furnished library, excellent chemistry, physics, biology and maths labs, meditation and cultural activities with indoor and outdoor sport facilities are also provided to these students..

2. Opening of School in backward area

Since education is essence of progress, it needs innumerable temples of learning. Our NGO is committed to promote free and quality education in the country to ensure that no child remains illiterate. In pursuance of this mission, we have set up replica of Shirdi Sai Baba School in Bundelkhand's backward village Niswara, Block Panwari, District Mohaba (UP).

3. Sai Dham Academy

Sai Dham has established world class academy where, the students are given academic guidance, learn about career options and right goals as per their interest. Sai Dham Academy is really helpful in admissions and career guidance. Sai Dham Academy develops different learning techniques for different type of students which helps them to select right goals to achieve.

4. Skill Development:

To provide an opportunity to girls hailing from under-privileged segment of the society, the institution is imparting free training in the trade of 'Tailoring on Industrial Sewing Machines' and within 30 days of the training, trainees are provided placements in Exports Houses at a monthly salary of Rs. 10,000/- per month with ESI & PF benefits. Dress Designing, Beauty & wellness, Computer education and General Duty Assistant (GDA) Patient Health Care are some of other training course run here.

5. Mass Marriages – A Boon to Poor Families

To mitigate hardship of poor parents, mass marriage of about 100 girls is performed four times in a year, irrespective of caste, creed and without any expenditure to their parents. So far more than 1000 marriages have been performed. This is being primarily done to solve difficulties, the poor people face in arranging funds for marriage of their daughters for which they often are forced to borrow few thousands on interest even at 5% per month that many a times they are unable to repay throughout their lives.

Health Care Services

When the NGO was established in 1988, a desire soon grew that we should serve the cause of the poor and needy through health care and established, one by one, eighteen charitable homeopathic dispensaries and other medical services serving about 1000 patients daily through:

01. Homeopathic clinics
02. Eye Clinic.
03. Allopathic Clinic
04. Psycho Neurobic Clinic (Cure of seven chakras without medicine)
05. HIV-AIDS and Family Planning awareness.
06. Blood Donation and COVID 19 Vaccination Camps.

Distribution of Clothes

In India 60-70% tribal and poor people do not have adequate clothes to cover their bodies. The situation is worse during winter season. We collect unsoiled old clothes, toys, shoes etc., recycle them and send two truck-loads per month to our associates in Bihar, Jharkhand, Chhattisgarh, Madhya Pradesh, Uttar Pradesh and Maharashtra for free distribution to tribal and poor people.

Distribution of Sanitary Napkins

The unhygienic period health and disposal practices can have major consequences on the health of women. This can increase a woman's chances of contracting Cervical Cancer, Reproductive Tract Infections, Urinary Tract Infection Hepatitis B infection, and Various Types of Yeast Infections, to name a few. For safeguarding their health, we have started manufacturing and supplying Sanitary Napkins to the rural girls and women through various corporate and social organizations.

Conversion of waste into Organic Compose and Bio enzyme

Students are being taught here to convert kitchen and garden waste into Organic Compose and Bio enzyme through kitchen waste of their houses. Thus reducing accumulation of waste and converting into useful pesticides free of chemicals.

Tax Exemption u/s 80G

Donations from within India qualify tax exemption u/s 80G of Income Tax Act, 1961.
